BioinformaticaVeldnorm

HPC wiki

Description

Fieldnorm for Bioinformatics within Medical Laboratories

Which procedures need to be documented for the development of pipelines, workflows or tools.

Badges

`documentation` `vuepress`   `vuepress` `2.0.0-beta.62`   `vue` `3.3.1`   `pnpm` `8.5.1`   `node` `16.18.0`

Installation

Node

First install Node Version Manager (NVM):

```
wget -qO- https://raw.githubusercontent.com/nvm-sh/nvm/v0.39.3/install.sh | bash
```

To verify if NVM has been installed, do:

```
nvm -v
```

This outputs `0.39.3` if the installation was sucesfull. If there is an error try to debug with the [official documentation](#).

Next install the correct Node version via NVM:

```
nvm install 16.18.0
```

Pnpm

Install the correct version of pnpm via:

```
curl -fsSL https://get.pnpm.io/install.sh | env PNPM_VERSION=8.5.1 sh -
```

Now navigate to the project folder and run:

```
pnpm install
```

Start the development version

To start the development version first navigate to the project folder. Next run the pnpm command:

```
pnpm docs:dev
```

This starts a local development version that can be viewed in a browser via `localhost:8080`.
